Let's connect the unconnected

VISION STATEMENT

"Excellence with Knowledge"

MISSION STATEMENT

"Lets connect the unconnected"

SERVICE PHILOSOPHY

"Partner in Productivity, Progress & Profitability through People"

Knowledge Resource Centre Foundation (KRC Foundation) is a diverse consulting organisation providing high quality professional services in the field of Media & Communication consulting, IT Services & Solutions, Training & Placements, Research, Entrepreneurship Coaching Services, Project Consulting and conducts theme based Events.

KRC Foundation has been working with the philosophy of ***'5E for Success'***.

5E stands for **Education**
 Employment
 Employability
 Entrepreneurship and
 Emotional Intelligence

KRC management team believes that these **5Es** are instrumental towards ***Personal, Professional and Social Success*** of any individual or a community or an entity.

For last 22 years, the Management Team has been providing expertise in Trainings, IT Services, Entrepreneur Development & Project Consulting for small business, industry, Government departments, educational institutions and social groups etc. within North Eastern Region as well as other parts of India.

We at KRC Foundation work in the field of media contents based on socio-political, youth, foreign affairs and have media products such as journals (both print & digital), web portals based on news & communications named as **KRC TIMES**.

Our project consultations also engage with individuals to develop any entrepreneurial environment. We work in social sector and we take up activities that facilitate social re-engineering. We proactively engage with various Government establishments to offer our services that can be taken to the grass root level and make all efforts to "connect the unconnected"

We also complement ourselves as a people centric organisation and try to take up issues and activities that positively impact people. We observed that youth and students; small businesses and entrepreneurs' face two major problems. → Lack of training; resources → in-depth of knowledge from a true "ownership" perspective. We continuously develop solutions to cater to the needs of students; professionals; budding entrepreneurs to gain knowledge, skills and self development - thereby shaping them towards a professional career, preparing them to be market ready and employable.
